Jamaica Can Produce Up to 50 Per Cent of Energy from Renewables - PM

Prime Minister, the Most Hon. Andrew Holness, says Jamaica has the potential to produce up to 50 per cent of the country's energy needs from renewable sources. The Prime Minister, who was speaking to reporters following a tour of BMR Jamaica Wind in St. Elizabeth on November 8, said the country "has to think carefully and strategically as

Prime Minister Andrew Holness has announced that Jamaica will officially increase its target for use of renewable energy to 50 percent. The previous target of 30% renewables was set as policy by Cabinet.

Jamaica's energy future: Why Portmore should go solar

Nuclear power might seem like a quick fix for Jamaica's energy issues, but it comes with long-term challenges we're not equipped to handle. Meanwhile, renewable energy options like waste-to-energy, solar, wind, and biomass are safer, more sustainable, and better suited to our island's unique strengths.

Energy profile: Jamaica

In 2020, Jamaica generated 4767 GWh of electricity; fossil fuels were the main energy source (88.67%), supplemented by smaller contributions from wind (5.87%), hydro (2.85%), and solar power (2.60%). More than a quarter (26.5%) of Jamaica's electrical output is lost through poor transmission and distribution infrastructure.
