Jena flow batteries Togo

JenaBatteries and BASF cooperate in the development of ...

JenaBatteries GmbH, founded in 2012 and headquartered in Jena, is an innovative company in the field of large-format energy storage systems from a battery size of 400 kWh. We develop, produce and sell safe and scalable metal-free redox flow batteries through a growing network of licensed partners.

Aktuelles

Hier finden Sie die neuesten Informationen, Entwicklungen und Fortschritte bei Jena Flow Batteries. Ob spannende Projektupdates, technologische Innovationen oder Veranstaltungen - wir halten Sie über alle wichtigen Neuigkeiten aus der ...

Wir sind Jena Flow Batteries.

Die Jena Flow Batteries GmbH ist ein führendes Unternehmen im Bereich der nachhaltigen Energiespeicherung. Wir bieten stationäre Speicherlösungen auf Basis der innovativen Redox-Flow-Technologie an. Unsere metallfreien Batterien stellen eine sichere, umweltfreundliche und skalierbare Lösung für die Anforderungen der Energiewende dar.

BASF partners with 'metal-free' flow battery startup JenaBatteries

JenaBatteries' website claims the startup has

made available a scalable redox flow battery for energy storage which goes from 100kW to 2MW power and 400kWh to 10MWh capacity ratings based on a saline solution, in which different organic storage materials form the anode and cathode.

JenaBatteries and BASF cooperate in the development of innovative power

JenaBatteries and BASF are cooperating in the production of an electrolyte for a battery technology that is particularly suitable for stationary storage of electricity from renewable energy sources and for stabilizing conventional transmission grids.

Technologie

Unsere metallfreie Redox-Flow-Batterie (auch „Flussbatterie“) ist so innovativ wie umweltschonend. Als frei skalierbarer Speicher ist sie die zukunftsorientierte Alternative zu herkömmlichen Lithium-Akkus und metallhaltigen Redox-Flow-Batterien.

A sustainable storage solution for clean energy JenaBatteries ...

The company develops large-scale redox flow batteries of 400 kWh and up. Following the successful product development phase, the company is ready to enter the market in 2021. Among stationary storage systems, the metal-free redox-flow battery offers a sustainable, uncritical alternative to conventional Li-ion batteries.
