Jersey solar panel programs

Join the Rooftop Revolution with Smart Solar

As part of its Smart Solar offer, JE is launching a Rooftop Revolution campaign, inviting Islanders to help to build Jersey's on-Island renewable power, which making environmental and cost savings. [Learn More](#)

How Solar Works

Solar power is harnessed from the sun's abundant energy through photovoltaic (PV) panels. These panels contain cells that convert sunlight into electricity. When sunlight hits the PV cells, it creates a flow of electrons, generating direct current (DC) electricity.

Sun Works

Produce your own energy, save money & reduce your carbon footprint with Sunworks - Jersey's first dedicated energy optimisation provider. With over 550 local solar installations we are the trusted choice for homeowners and businesses wanting to invest in the future.

Solar Panel Installers Jersey , Solar Panels Network

At Solar Panels Network, we make solar panel installation in Jersey an attractive process without compromising on its efficiency. All of the providers in our network have been thoroughly

researched and vetted to ensure that they deliver the best design, installation, and services.

Solar PV - Isle Eco Jersey

Solar electricity is green renewable energy and doesn't release any harmful carbon dioxide or other pollutants. A typical home solar PV system could save over a tonne and a half of carbon dioxide per year - that's more than 30 tonnes over its lifetime.

New incentives for home solar on cards

Jersey Electricity is currently looking at ways to encourage more islanders to put solar panels on their roofs - but the company says its key focus is on building commercial and ground-based arrays. The company, which is majority owned by taxpayers, has bought back electricity for more than a decade from households that have solar panels.

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life **≥8000** Nominal Energy **200kwh** IP Grade **IP55**

Residential Solar

Turn your home into an energy saving asset with Solar PV Technology. Solar Photovoltaic (PV) provides extra on-site electricity, ensuring your regular connection to the power grid. Daylight powers your panels, offsetting grid electricity purchases, saving you money.

Solar PV

Solar PV explained. Solar photovoltaic (PV) systems are made up of panels that fit on top of your roof, but you can also install them on the ground or fit solar tiles. Solar PV cells are made from layers of semi-conducting material, usually silicon. When sunlight shines on the panels or tiles, electrons create a flow of electricity.
