

Kosovo tsl energy

Overview

(ERO) is an independent company which sets the regulatory framework founded on the principals of free trade. The energy price is determined by different factors: operative cost, maintenance cost, import and other factors. The decrease of commercial and technical losses would affect positively. Factors that have kept the low prizes until now are: foreign investments as grants, subventions, the lack of investments for environment.

The energy sector in Kosovo

In March 2023 Kosovo became the first Western Balkan country to adopt an Energy Strategy that no longer promotes hydropower, due to its serious environmental impacts. However, despite positive plans for solar and wind development, and to introduce carbon pricing starting from 2025, the Strategy hesitates to commit to clear closure dates for the

Electrical energy in Kosovo

KEK generating about 97% of the energy has the monopoly of market. ERO has the jurisdiction of setting tariffs for energy services. Until 2020, Kosovo promoted renewable energy in the electricity sector using a feed-in tariff, which was suspended by the ERO due to the cost-efficiency of competitive support mechanisms. Kosovo is now developing a

Kosovo

The Kosovo Assembly passed the National Energy Strategy in March 2023, laying out the government's vision for the energy sector in the coming decade and committing to increase generation from renewable energy sources to at least 35 percent of the generation mix, reduce greenhouse gas emissions by 32 percent, and phase out at least one lignite
