Uganda Energy Transition Plan

the launch of the Energy Transition Plan, Uganda announces its intention to reach net zero emissions in its energy sector by 2065, which paves the way for our country to explore a formal economy-wide target for climate neutrality.

Uganda Energy Situation

In 2012, Uganda had to import energy in the amount of 1,187,672 TOE (different petroleum products) while the amount of exports (only electricity) amounted to 8,514 TOE. Uganda's main source of energy is biomass. Regarding electrical ...

600 MW Karuma Hydro Power Plant, Uganda , AFRY

Uganda faced a critical need to increase its electricity capacity to keep pace with growing energy demands while providing the grid with secure, stable energy. AFRY played a pivotal role in constructing the 600 MW Karuma Hydro Power ...

600 MW Karuma Hydro Power Plant, Uganda , AFRY

Uganda faced a critical need to increase its electricity capacity to keep pace with growing energy demands while providing the grid with secure, stable energy. AFRY played a pivotal role

in constructing the 600 MW Karuma Hydro Power Plant and its grid interconnection, which has become Uganda's largest power generating facility.

Application scenarios of energy storage battery products

Uganda targets 2027 start for world's longest heated oil pipeline

Uganda is set to become an energy producer by 2027, allowing the landlocked nation to export oil from two oilfields via a \$4bn, 1,443km-long pipeline that would run through Tanzania to the port
