

Laos jm battery systems

Overview

Johnson Matthey Battery Systems is independent of cell suppliers, allowing the company to deploy a range of cell chemistry for its automotive products. Currently, it works mainly with and Lithium NCM (Nickel Cobalt Manganese) chemistries. It is also working on a project to develop a high energy density /Silicon alloy battery for () applications.

Johnson Matthey Battery Systems

Johnson Matthey Battery Systems (JM Battery Systems) is a leading supplier of batteries for electric and hybrid vehicles, processing over 70 million cells a year. Part of the Johnson Matthey group, the organisation also manufactures batteries ...

Battery Management System

Our advanced battery management systems (BMS) provide robust electronic protection, guaranteeing flawless use of the application. The battery management system is a basic component of a battery pack with multiple cells. It monitors the battery status by measuring and controlling key operating parameters and thus ensuring safety.

About us

We are a leading manufacturer of advanced battery systems with a market presence of over 25 years. We specialise in rechargeable lithium-ion batteries, producing a wide range of systems with varying power and capacity.

Laos Battery Management Systems Market (2024-2030) , Industry

Laos Battery Management Systems Market is expected to grow during 2023-2029 Laos Battery Management Systems Market (2024-2030) , Industry, Competitive Landscape, Trends, Growth, Share, Outlook, Analysis, Value, Companies, Forecast, Segmentation, Size & Revenue

History

Today, as a European leader, we use the best available solutions to create battery systems that can perform better and last longer. Our products, powered by unparalleled technological expertise, provide tangible value to customers ...

History

Today, as a European leader, we use the best available solutions to create battery systems that can perform better and last longer. Our products, powered by unparalleled technological expertise, provide tangible value to customers around the world.

Johnson Matthey Battery Systems

Johnson Matthey Battery Systems' BMS incorporates proprietary battery management electronics, and its four main objectives are to protect the cells and the battery from damage, prolong the life of the battery, maintain the battery in a state where it can meet the requirements of the application and to interface with the host application.
