SunDrive Solar innovation creates next generation panels

SunDrive has grown from a small PhD project in a garage to producing some of the most efficient solar cells ever made in the world. The company opened a production and commercialisation facility in Kurnell, NSW in November 2023 and is aiming to ...

Maxwell, SunDrive claim HJT cell 'breakthrough' after

NuVision Solar, a new US-based solar manufacturer, has been formed and aims to build a heterojunction (HJT) solar cell and module assembly plant in the US.

SunDrive Solar and Trinasolar Join Forces to Boost Australia's Solar

SunDrive Solar, Australia's leader in solar innovation, and Trinasolar, one of the world's largest solar manufacturers, have signed a Memorandum of Understanding (MoU) to form a majority Australian-owned joint venture (JV). This JV aims to establish cutting-edge solar manufacturing capabilities in Australia.

SunDrive Solar, Trina Solar to jointly make solar panels in Australia

Sydney-based startup SunDrive Solar has signed a memorandum of understanding (MoU) with PV

manufacturing heavyweight Trina Solar to accelerate the development of its copper-based solar cell

Driving the nation's great solar panel manufacturing comeback

Australian solar innovator SunDrive is determined to build Australia into a solar power manufacturing powerhouse with the help of heavyweight investors in its corner.

New study looks at Sundrive's 25.54% silver-free heterojunction solar ...

Sundrive revealed in September 2021 that it had achieved a record-breaking power conversion efficiency of 25.54% for a silver-free heterojunction solar cell. Now, in a new paper that was recently published in Progress in Photovoltaics, scientists from Sundrive and Maxwell describe the technological innovations that made this possible.

SunDrive Solar Startup Beats China's Giant ...

SunDrive Solar, the company he co-founded in 2015 based on this research, proved this week that it has produced one of the most efficient solar cells of all time, according to a leading independent testing laboratory. And ...

SunDrive Solar Startup Beats China's Giant Manufacturers in Efficiency

SunDrive Solar, the company he co-founded in 2015 based on this research, proved this week that it has produced one of the most efficient solar cells of all time, according to a leading independent testing laboratory. And SunDrive did ...

SunDrive Solar , Australian Solar Technology , Sydney

SunDrive is a solar technology company based in South Sydney, Australia. We're creating unique solutions to reduce the cost of high-efficiency solar cells, whilst enhancing their performance and sustainability by utilising more abundant materials.

SunDrive Solar confirms job cuts as it 'sharpens focus on solar'

SunDrive's novel solar cell technology replaces the silver traditionally used in solar cell production with copper, a material that is orders of magnitude cheaper and more abundant than

SunDrive Solar partners with Capral Aluminium

Australian PV cell technology startup SunDrive Solar has partnered with Capral Aluminium to build a sustainable and domestic supply chain for solar PV in Australia.
