improve the quality of installations of solar PV systems in Lebanon. The goal is to increase the level of consumers' trust and confidence with the solar PV technology and with companies supplying and installing these systems. The above list ...

Solar Photovoltaic Lebanon

When the grid electricity is always available; the on-grid solar solution converts solar energy to electricity and feed directly to the grid. Net Metering in Lebanon allows the user to exchange electricity with "Electricite Du Liban", producing by day, consuming by night, and pay against the net consumption, thereby reducing one's energy bill down to zero.
