Linka Energy A/S

Linka Energy is among the world's leading developers of biomass plants for everything from residential to industrial use. Based on our clients' needs, we develop reliable solutions with an efficient use of the selected biofuels within: ...

Home

Linka Energy is a specialist in the development, design and construction of fully automated biomass plants from 250 kW - 15 MW. The primary fuel types are straw, wood chips and wood pellets, but also more exotic fuels can be used.

Linka Group

Since 1978, Linka Energy has built fully automated plants, thus helping to reduce large amounts of CO2 with our customers. More than 40 years of experience and know-how about biomass combustion make the company one of the world's leading companies in the industry.

Linka Group

About us

Linka was founded in 1978 in the wake of the global oil crisis. Since the beginning we have focused on the development and optimization of environmentally friendly forms of energy based on biomass. Today we are among the world leaders within development, design and construction of fully automatic high-quality plants worldwide.
