

# Luxembourg energy cutting solutions

## Overview

---

As a specialist in renewable energy, Enovos develops and manages projects from the beginning to the end, starting with the design of the installation, including environmental impact studies, and ending with the application for the various permits required to build the installations.

Enovos invests in power plants over the long-term and offers to interested partners the opportunity of co-investment in these sustainable projects to.

Enovos is an expert in multi-technology construction. All our projects are followed by our specialized project managers, to ensure the successful execution of the complete services from the design of the plant to its commissioning.

In addition to the project implementation, Enovos also takes care of the daily asset management and maintenance of the plants. The facilities are continuously monitored by our asset.

## Toward net-zero emissions: Achieving Luxembourg's ...

Luxembourg is aiming to exceed the EU-wide goal of 55 percent reduction in carbon emissions by 2030 and net-zero emissions by 2050 and to simultaneously double down on energy affordability and energy supply security.

## Luxembourg energy efficiency & Trends policies

The Energy Efficiency Obligation Scheme is one of the most ambitious cross-cutting measure implemented in Luxembourg in the field of energy efficiency. It was designed according to the article 7 of the Energy Efficiency Directive 2012/27/EC and was introduced in 2015 for a first period covering the years 2015 to 2020.

## Adapting to a Sustainable Energy Landscape for Luxembourg

The goal of the project is to assess how the Luxembourgish energy system can adapt to a more volatile and unpredictable future, and leverage flexibility to stabilise the grid. For this purpose, the project will focus on four energy-consuming sectors: industry, SMEs (small and medium-sized enterprises), households, and mobility.

## Luxembourg

As a driving force behind the energy transition, Enovos relies on cutting-edge technologies and deploys innovative solutions based on strong local partnerships. With the aim of accelerating the energy transition in Luxembourg, since 1998 Enovos has been developing energy production from renewable sources in the Grand Duchy by

setting up
