Maldives winder power group

Maldives announces major wind energy project

The Maldives' State Electric Company Limited, STELCO, have signed a 20-year agreement with Falcon Energy, whereby Falcon Energy will build and operate a 75 megawatt ...

The Role of Wind Energy in the Maldives' Energy Market

The Maldives, a tropical paradise renowned for its stunning white-sand beaches and crystal-clear waters, is making significant strides in the renewable energy sector. The country is increasingly turning to wind energy to meet its growing energy demands, thereby reducing its dependence on expensive and environmentally harmful fossil fuels.

The President announces Maldives seeks investors for ocean ...

The President highlighted that Maldives' renewable energy capacity increased from 53 to 68 megawatts since COP28. He detailed plans to reach net-zero emissions by 2030 ...

Home

A designer, manufacturer and supplier of specialist generators for the rail, military, aviation and power generator sectors. Products

include high frequency alternators, permanent magnet generators and synchronous machine exciters.

The Role of Wind Energy in the Maldives' Energy Market

The Maldives, a tropical paradise renowned for its stunning white-sand beaches and crystal-clear waters, is making significant strides in the renewable energy sector. The country is increasingly turning to wind energy to ...

World's first 'surf waves to electricity

World's first pilot project to harness electricity from powerful surf waves has been launched at Holiday Inn Resort Kandooma Maldives. The project is the brainchild of Professor Tsumoru Shintake of The Okinawa Institute of Science and Technology Graduate University (OIST), the Maldives environment ministry and Kokyo Tatemono Company Limited

Wind Resource Mapping in the Maldives

To decrease the dependency on imported fuels, the Maldives Government is planning to transform the energy sector with a target of achieving carbon neutrality. The Maldives has good prospects for solar and wind energy, but these resources have not been extensively measured or exploited for any significant

electricity generation to date .

Wind Resource Mapping in the Maldives

To decrease the dependency on imported fuels, the Maldives Government is planning to transform the energy sector with a target of achieving carbon neutrality. The Maldives has as ...

Maldives announces wind energy project

The Maldives' State Electric Company Limited, STELCO, have signed a 20-year agreement with Falcon Energy, whereby Falcon Energy will build and operate a 75MW wind farm in Gaafaru island, North Male' atoll.

First ever wind energy system established in Maldives

Maldives has marked the inauguration of wind energy systems for the first time, accompanied by the commencement of operational water supply networks in Kaashidhoo, Kaafu Atoll.

The President announces Maldives seeks investors for ocean ...

The President highlighted that Maldives' renewable energy capacity increased from 53 to 68 megawatts since COP28. He detailed plans to reach net-zero emissions by 2030 with investments in solar, wind, and other renewables, while also expanding solar installations and cutting fossil fuel use.

Maldives announces major wind energy project

The Maldives' State Electric Company Limited, STELCO, have signed a 20-year agreement with Falcon Energy, whereby Falcon Energy will build and operate a 75 megawatt wind farm in Gaafaru island, North Male' atoll.
