

# Mayotte access solar

## Overview

---

The first were installed in 2009, and are not associated with storage. The installed capacity is 13 MW, in particular via the Longoni power plant, inaugurated in 2010. Solar energy is the only renewable energy with significant development potential on the island; the wind potential (22 MW according to a study) would not lead to a significant production because the wind blows only 6 months per year.

## Mayotte access solar

### Energy in Mayotte

Solar energy is the only renewable energy with significant development potential on the island; the wind potential (22 MW according to a study) would not lead to a significant production because the wind blows only 6 months per year.

### Mayotte se dote d'une centrale photovoltaïque

Le producteur d'énergie renouvelable Akuo a inauguré la centrale photovoltaïque avec stockage de Hamaha sur l'île de Mayotte. Le site valorise une ancienne décharge qui a arrêté de recevoir des déchets ménagers depuis 2014 ...

### Production of renewable energy in Mayotte

HAMAHA, in Mamoudzou, makes use of a non-buildable former landfill, thanks to the installation of 1.2 MWp of solar panels on a now secured site. A 2.5 MWh battery will also allow for injection at peak hours in the evening.

### Akuo cuts ribbon on 1.2-MW solar park with storage in ...

French renewable power producer and developer Akuo has officially opened a 1.2-MW solar park equipped with an integrated energy storage facility on the island of Mayotte in the Indian

Ocean. The Hamaha photovoltaic ...

## Hamaha

The Hamaha plant is a photovoltaic farm with storage located on the Indian Ocean island of Mayotte inaugurated in November 2023. The plant has been installed on the site of a former landfill to the northeast of the island that stopped receiving household waste in 2014 in order to begin its rehabilitation phase.

## Harnessing solar power to boost climate adaptation in Mayotte: ...

Sun Water Fire's innovative technology offers a unique opportunity for Mayotte to achieve energy independence, enhance water management, and tackle climate adaptation in a transformative way

**2MW / 5MWh**  
**Customizable**

## Mayotte

In Mayotte, Albioma operates a photovoltaic fleet with an installed capacity of 15,3 MW. All power plants are sited in locations free from conflicts of use, including the one above Mamoudzou market, which features 725 KW of solar panels, making it the Group's most powerful rooftop plant.

## La première serre photovoltaïque de Mayotte mise en service à ...

La solution innovante contribue à développer le potentiel solaire de Mayotte tout en préservant ses terres fertiles. Seulement voilà, elle nécessite un terrain sans relief.

## Energy in Mayotte

Overview Renewable energies Electricity Thermal power stations Oil

The first solar panels were installed in 2009, and are not associated with storage. The installed capacity is 13 MW, in particular via the Longoni power plant, inaugurated in 2010. Solar energy is the only renewable energy with significant development potential on the island; the wind potential (22 MW according to a study) would not lead to a significant production because the wind blows only 6 months per year.

## Akuo Unveils 1.2 MW Hamaha Plant in Mayotte, France

Featuring Lithium-ion batteries, the plant's storage mechanism stabilizes the grid by smoothing out solar production and injecting stored energy during peak demand, facilitating Mayotte's transition to a more stable and renewable energy grid.

## Akuo cuts ribbon on 1.2-MW solar park with storage in Mayotte

French renewable power producer and developer Akuo has officially opened a 1.2-MW solar park equipped with an integrated energy storage facility on the island of Mayotte in the Indian

Ocean.

## Akuo cuts ribbon on 1.2-MW solar park with storage in Mayotte

French renewable power producer and developer Akuo has officially opened a 1.2-MW solar park equipped with an integrated energy storage facility on the island of Mayotte in the Indian Ocean. The Hamaha photovoltaic (PV) plant will support the archipelago's goals of adding 60 MW of renewable energy capacity by 2028 to the 25 MW already
