Comprendre l'énergie solaire photovoltaïque

À l'heure de la transition énergétique vers des énergies moins carbonées et plus « vertes », l'énergie solaire suscite un fort intérêt et plus particulièrement à Mayotte. Zoom sur cette énergie qui accompagne aujourd'hui la transition énergétique du territoire.

Akuo Unveils 1.2 MW Hamaha Plant in Mayotte, France

Akuo inaugurated the Hamaha solar plant with storage on Mayotte Island. Built on a former landfill, the project, developed in collaboration with local authorities, repurposes the land for a 30-year decontamination period.

Panneau solaire à Mayotte > JUA

Faites le choix d'une installation de panneau solaire réussie à Mayotte avec JUA, expert de l'autonomie solaire et spécialiste de l'énergie solaire en site isolé. JUA vous propose des solutions sur mesure, grâce à du matériel sélectionné chez les meilleurs fabricants, et vous accompagne à chaque étape de votre projet, de la

Inauguration of the Hamaha plant in Mayotte

The plant incorporates an energy storage mechanism using Lithium-ion batteries. These

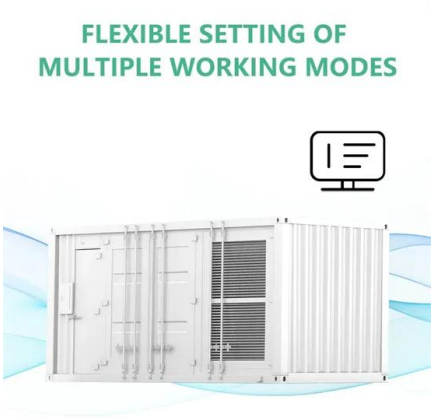
batteries enable solar production to be smoothed out and 3.5 MWh - i.e. the electricity produced by the plant in 3 hours - to be stored.

Notre présence à Mayotte

À Mayotte, Albioma exploite un parc photovoltaïque d'une capacité installée de 15,3 MWc. Ses centrales sont toutes implantées dans des zones sans conflit d'usage, comme celle du marché de Mamoudzou qui est, avec ses 725 KW de panneaux solaires, la plus puissante installation en ...

Hamaha

The Hamaha plant is a photovoltaic farm with storage located on the Indian Ocean island of Mayotte inaugurated in November 2023. The plant has been installed on the site of a former landfill to the northeast of the island that stopped receiving household waste in 2014 in order to begin its rehabilitation phase.

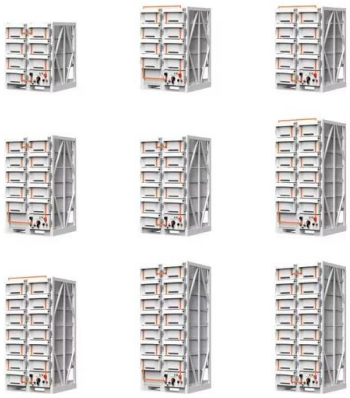


Mayotte

In Mayotte, Albioma operates a photovoltaic fleet with an installed capacity of 15,3 MW. All power plants are sited in locations free from conflicts of use, including the one above Mamoudzou market, which features 725 KW of solar panels, making it the Group's most powerful rooftop plant.

Production of renewable energy in Mayotte

HAMAHA, in Mamoudzou, makes use of a non-buildable former landfill, thanks to the installation of 1.2 MWp of solar panels on a now secured site. A 2.5 MWh battery will also allow for injection at peak hours in the evening.



ENERGY PROFILE Mayotte

emissions from renewable power is calculated as renewable generation divided by fossil fuel generation multiplied by reported emissions from the power sector. This assumes that, if renewable power did not exist, fossil fuels would be used in its place to generate the same amount of power and using the same mix of fossil fuels. In countries and
