

Merus power oyj Philippines

Merus power oyj Philippines

About us

Merus Power is a Finnish technology company operating in the global market, focusing on innovative and scalable energy storage systems and power quality solutions. With our world-class technical competence, we are contributing to the global shift towards sustainable energy and enabling the use of renewable energy sources in growing markets.

Merus Power Oyj Company Description

4 · The company offers lithium-ion-based battery energy storage systems under Merus ESS brand name. Its power quality solutions include Merus A2, an active harmonic filtering solution; Merus 4DRIVES, an optimized active harmonic filter for variable frequency drives; Merus HPQ, an all-in-one power quality system for combined active harmonic

About us

Merus Power is a Finnish technology company operating in the global market, focusing on innovative and scalable energy storage systems and power quality solutions. With our world-class technical competence, we are contributing to ...

Merus Power Company Profile 2024: Stock Performance

Merus Power Oyj is engaged in the design, manufacturing and sale of domestic innovative electricity storage, power quality solutions and services. The company's business is based on scalable and modular power electronics, intelligent software technologies and electrical engineering expertise.

For investors

Merus Power is a Finnish technology company specializing in energy storage systems and power quality solutions on a global market dedicated to a sustainable and more energy-efficient future. What's new

Electrify your Future

Merus Power is recognized as a desired technological partner for its extensive power quality experience, innovative technological solutions, and highly qualified personnel, among others. We aim to provide cost-effective and reliable solutions with benefits that are appreciated by our customers and exceed their needs.

Products and services

Innovative energy storages and power quality equipment. We design and manufacture innovative energy storages, active harmonic filters and power quality compensators for the needs of renewable energy and the industry.
