

# Mirai solar Guernsey

## Mirai solar Guernsey

---

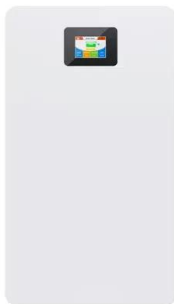

### Mirai-solar

Mirai Solar is a solar energy company, focusing on expanding the utilization of solar energy beyond conventional applications. Inventing the Mirai Screen: a lightweight and foldable electricity generating shade screen, to improve the energy use efficiency of greenhouses and smart buildings for a sustainable future.

### Solar Photovoltaics

More commonly known as Solar PV, these panels are designed to produce clean, renewable electricity from the sun to power your home. It's also possible to sell the electricity your system generates to Guernsey Electricity to supply the island with even more renewable electricity.

### Mirai Solar Company Profile 2024: Valuation, Funding & Investors

### Mirai Solar

Mirai Solar is revolutionizing global greenhouse cooling systems by using simple drop-in photovoltaic shades to replace existing shade cloths. Farmers use the solar shades to generate the electricity required for greenhouse cooling,

lowering their production costs. Website: <https://>

## Home

Our island's imported electricity is sourced from 100% renewable energy, including solar, wind and hydroelectricity. This is brought into the island through a subsea cable and distributed to every home and business using an ...

## Mirai Solar , VentureRadar

Their flagship product, the Mirai Screen, is a photovoltaic solar screen that offers variable shading while generating electricity, suitable for greenhouses, carparks, and mobile containers. Their foldable solar modules are designed for Zero Energy Greenhouses, electric vehicle charging in carparks, and increased energy yield on shipping containers.

## Home

Our island's imported electricity is sourced from 100% renewable energy, including solar, wind and hydroelectricity. This is brought into the island through a subsea cable and distributed to every home and business using an underground network of cables.

## Renewable Energy Generation Summary Impacts

Mirai Solar seeks to expand the utilisation of solar energy with innovative new applications. It has developed a multifunctional shading system for building integration that is based on photovoltaic technology and uses blocked sunlight to generate electricity. Mirai Solar claims that the consequent power generated can provide customers with
