Monaco's green movement is fostering economic growth by investing in green energy and sustainable infrastructure, which attracts environmentally conscious tourists and businesses. Environmental accreditation programs also play a significant role in promoting eco-tourism, further boosting the principality's economy.

Energy Transition in Monaco

The Principality of Monaco is committed to

reducing its greenhouse gas emissions by 50% by 2030 in comparison with 1990. To achieve this aim and set the Principality on the route to carbon neutrality by the 2050 deadline, the national action plan focuses mainly on the three sectors that emit the most greenhouse gas, namely road transport, waste

Monegasque companies endorsing renewable energy

Do you feel it in your own company, Monaco Green Energy, which develops photovoltaic power plants? Monaco Green Energy supports governments in energy transition. ...

Energy source

Green electricity purchased in the Principality of Monaco accounts for around 75% of total consumption. Green electricity is any electricity produced from a renewable energy source. This currently includes: solar energy (including photovoltaic and thermal), wind energy, tidal energy, wave energy, hydroelectric energy, geothermal energy and biomass.
