Building Management systems , Green Wave Group , South Africa

Green Wave provides turnkey Solar Energy solutions for both Commercial and Industrial customers; and residential clients. Our service offering includes engineering design, implementation, support, and financing of projects.

Building Management System is the blueprint for smart

One of the main features of BMS is that it helps operators minimise energy use and waste, and research shows that it controls as much as 80% of a building's energy use. "I think given the intense focus on energy and power supply in South Africa, the use of BMS to manage energy use, conservation and optimisation makes sense," says Evans.

Building Management System , Schneider Electric South Africa

A smart building management system is a platform for integrating building, business, device IoT data and segment-specific speciality systems such as air quality monitoring for hospitals, or room booking systems for hotels.

Building Management System is the blueprint for smart ...

At this time of automated, centrally-managed and smart control in South Africa's building construction industry, Building Management Systems (BMS) plays a lead role as a computer-based approach to managing facilities and equipment.

Building Management Systems

The system is typically a computer-based monitoring system which controls areas of energy and water use. In addition, some systems extend to monitoring security and fire systems plus access systems, lifts and elevators. In short, your entire building can be controlled from a central point.
