Column: Embracing Bermuda's Energy Future

According to the International Energy Agency [IEA], "renewable energy sources like offshore wind are expected to be among the cheapest and most environmentally beneficial options for islands

The National Electricity Sector Policy of Bermuda

Developments in technologies for renewable energy, energy efficiency, and conventional energy give Bermuda the opportunity to change how it sources and uses energy. Introducing new

technologies to the Island may lower the cost of service, reduce local pollution as well as

Energy in Bermuda

Historically like other modern developed countries around the world, Bermuda has depended on fossil fuel for energy production for electricity, heating, cooling and transportation. Due to this dependence on external resources for energy, security of supply and production of energy have always been subjects of interest by both government and non

Bermuda's Road to Clean Mobility and Energy

Bermuda has committed to 85 percent renewable energy by 2035. To achieve this, the nation has committed to 21 MW of solar, 60 MW of wind, and 100 percent electric public transport by 2030* -- reducing harmful emissions, slashing energy costs, and increasing local resilience.

Integrated resource planning for Bermuda

We had the pleasure of welcoming the Regulatory Authority of Bermuda to our Madrid office earlier this month to discuss the next steps in the update of the island's Integrated Resource Plan (IRP), which provides a roadmap for the decarbonisation of the electricity sector.

Energy

The Department of Energy provides: for the development of energy policies within Government and throughout Bermuda. a broad public education campaign highlighting issues with fossil fuel dependence; energy efficiency and conservation; and ...
