

Ndrc new solar container mixed reform

Overview

Previously, in February 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued Document No. 136, explicitly stating that energy storage configuration should not be a prerequisite for the approval of new energy projects. On February 9, 2025, China's National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) jointly issued the Notice on Deepening the Market-Oriented Reform of New Energy On-Grid Electricity Prices to Promote High-Quality Development of New Energy (hereafter, China plans to reduce renewable energy subsidies after a significant surge in solar and wind power installations led to achieving its 2030 target six years early. The National Development and Reform Commission will implement market-based bidding for new projects starting June, while efforts to. What are the new solar energy regulations of the National Development and Reform Commission?

The new solar energy regulations set forth by the National Development and Reform Commission (NDRC) in China focus on advancing the renewable energy sector while promoting economic growth and environmental. This study provides a relatively comprehensive and systematic theoretical description and analysis of the current state of development of agrivoltaics (or Agri-PV, APV) in China and the underlying drivers through literature review, policy document study, expert interviews, and case. On January 8. A new policy mandating full market integration is reshaping China's new energy industries, favoring those ready to compete. On February 9, China's National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) jointly issued a document No. 136. This document is a. The NDRC plans to shift to a market-based bidding system for electricity payments after June 2025. China now has 887GW of installed solar power, more than six times the capacity of the US.
