### TC Energy Corporate Profile

about strategies and goals for growth and expansion, including acquisitions, expected cash flows and future financing options available along with portfolio management, expectations about the new Liquids Pipelines Company, South Bow Corporation, following the anticipated

**Niue's new Power Station soft launch marks significant step in energy ...**

With the upcoming reintegration of the BESS and solar farms by December, Niue is poised to move closer to its goal of 80% renewable energy production by the end of 2025. The Ministry now has both old and new power stations available to ensure consistent energy delivery to all communities.

### ENERGY PROFILE Niue

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

### A TC Energy first: Compression modular innovation

These compressor stations will support TC Energy's critical role in supplying energy and serve as proof of concept for future facility builds across the company's North American footprint. Watch how this all unfolded in under a minute.

### Niue: Energy Country Profile

Niue: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

## Niue Power Corporation

Historically the Niue power sector relies 100% on imported diesel fuels for generating power until July 2009 when 52kWp PV grid-connected systems was installed through EDF9 funds of the European Union. The Niue Power Corporation (NPC) is a trading department of Niue Government, mandated with the generation and distribution of

## The Government of Niue , Power Outage notification for Niue

The NPC reticulation team are proactively replacing transformers and cables wherever possible, however with over 100km of power reticulation in Niue, this is a major task. Support from the GEF funded AREAN project, along with NZ's commitment of \$20 million for renewable energy are addressing the stability of Niue's grid, funding the
