Kallista Energy. 39 likes · 85 talking about this. Bienvenue sur la page Facebook officielle de Kallista Energy. Acteur indépendant des énergies renouvelables, notre démarche s'inscrit dans la durée

Our history

Since 2005, Kallista Energy has been contributing to the energy transition by remaining true to its values: conviction, ethics, pragmatism and sustainability. Our group is continuing to grow its portfolio of activities while maintaining the same high ...

Homepage

Kallista Energy is an independent renewable energy company. Our activities include wind, solar, electric mobility and battery energy storage. Our approach is focused on the long term, with the objective of generating electricity in the most cost-effective ...

Kallista Energy acquires stake in Netherlands wind farm ...

With the acquisition of the Krammer and Oostflakkee wind farms, Kallista Energy will have 134MW of onshore wind capacity in the Netherlands and 213MW of capacity in operation

in France.

Norfolk Island Renewable Energy Program

In late 2021, Incite Energy were appointed to review the operations and systems within the Norfolk Island Regional Council (NIRC) electricity business unit (NI Electricity) and implement changes to transition the island to an electricity grid dominated by renewable energy, allowing electricity tariffs to be reduced.

Our expertise

Kallista Energy ensures its external growth by acquiring projects or energy production plants of all sizes. We integrate all the expertise required to successfully complete acquisitions (asset valuation, due diligence, drafting of contracts, etc.).

Kallista Energy acquires stake in Netherlands wind farm from Enercon

With the acquisition of the Krammer and Oostflakkee wind farms, Kallista Energy will have 134MW of onshore wind capacity in the Netherlands and 213MW of capacity in operation in France.

Our energies

Kallista Energy's core business is producing competitive, renewable electricity to contribute to the energy transition and electric mobility. Our group generates electricity from its wind and solar farms in France, Germany and the Netherlands.
