Overkill Solar BMS Settings

I have a 100ah LifePo4 battery with internal BMS. I am using Overkill Solar app to access the BMS. My first question is can someone show what the

best settings are for each of the configurable settings.

Overkill Solar Review

With my two Overkill Solar 8s 24volt 100amp BMS set at 3.65 Cell Voltage Limit this works well for both battery banks that are in parallel configuration. It is my understanding that a Digital low voltage battery cut-off relay module is able to turn on and off the Heltec active balancer like the Victron 712 BMV shunt relay, but I have not tried

Here you will also find the version notes for every update of the mobile app. Note: Regardless of how you load the app, it will silently update when we publish bug fixes, assuming the device has an internet connection.

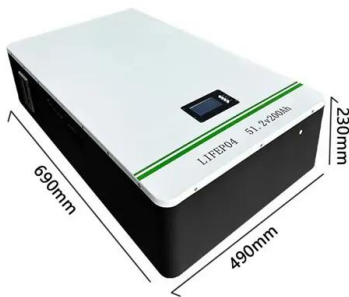

Overkill Solar - More is Better...

Rather than adapting to a new JBD design, we are finishing our new BMS design ASAP. JBD has new models available, but we have rejected all of their offerings for various reasons, mostly due to the complete lack of security on their built-in bluetooth connection. The new BMS is named The Pathfinder BMS by Overkill Solar.

Understanding OverKill Solar 4S BMS Settings

It appears that the main parameters that will determine when the BMS disconnects (during a capacity test) are Pack Undervoltage and Undervoltage (individual cell). I'm going with pretty much stock settings for the BMS (Pack Undervoltage: 10V, Undervoltage 2.5V).

OverkillSolar app

Below is what I understand about your battery, BMS, and app. Please confirm the information, or provide corrections if I have it wrong. 1) You have a 12V 50Ah LFP battery from MavericEnergy 2) The BMS in the battery is a JBD BMS with bluetooth 3) You are now connecting to the BMS with the Overkill Solar app (this is a good app to use)
