

Portugal community batteries

Portugal community batteries

Battery Cluster Portugal

To strengthen the competitiveness of the Portuguese industrial value chain and innovation ecosystem in batteries and energy storage technologies, through the development and transfer of new sustainable and disruptive technologies to ...

Batteries are the central element in a project that ...

The need to create alternative ways to generate, store and distribute electricity is at the heart of the Mobilizer Project "Baterias 2030", financed by the Portugal 2020 Program and which brings together a total of 14 ...

Battery Cluster Portugal

To strengthen the competitiveness of the Portuguese industrial value chain and innovation ecosystem in batteries and energy storage technologies, through the development and transfer of new sustainable and disruptive technologies to the global market.

European Commission funds battery project linked to EDP power ...

The European Commission, through the Innovation Fund programme, has recognised the innovative nature of EDP's project to build one of Europe's largest batteries connected to a

combined cycle power station. This recognition reinforces the group's global leadership in the energy transition and the Iberian Peninsula's potential in this

Batteries are the central element in a project that announces new ...

The need to create alternative ways to generate, store and distribute electricity is at the heart of the Mobilizer Project "Baterias 2030", financed by the Portugal 2020 Program and which brings together a total of 14 companies and 9 research centres.

Coimbra researchers investigating lithium-free electric batteries

Aiming to make batteries 'safer' and 'democratise electricity' Researchers from the University of Coimbra (UC) have developed a project for a new generation of batteries that could be safer and have greater durability, as well as democratising electricity, the university announced today.

Coimbra researchers investigating lithium-free electric batteries

Aiming to make batteries 'safer' and 'democratise electricity' Researchers from the University of Coimbra (UC) have developed a project for a new generation of batteries that ...

The European Commission funds a battery project linked to EDP ...

BiggBatt, a 150 MW battery project to be located next to the Ribatejo power plant (Portugal) has been one of the European projects selected by the Innovation Fund

EDP Renovaveis SA

The BigBATT project involves installing 150 MW of storage batteries in Carregado, next to the Ribatejo combined cycle power station. By taking advantage of existing infrastructures, this demonstrates not only the ...

European Commission funds battery project linked to EDP power ...

The European Commission, through the Innovation Fund programme, has recognised the innovative nature of EDP's project to build one of Europe's largest batteries connected to a ...

EDP Renovaveis SA

The European Commission through the Innovation Fund program has recognized the innovative character of EDP's project to build one of the largest battery systems in Europe connected to a BiggBatt, a 150 MW battery project to be located next to the Ribatejo power plant (Portugal) has been one of the European projects selected by the Innovation

EDP Renovaveis SA

The BigBATT project involves installing 150 MW of storage batteries in Carregado, next to the Ribatejo combined cycle power station. By taking advantage of existing infrastructures, this demonstrates not only the optimisation of resources but also the viability of scalable, flexible, and innovative solutions to reduce emissions.

Green light for Algarve battery storage plant

Galp has entered into a partnership with North American company Powin to install an energy storage system, using large-scale batteries, in one of its photovoltaic plants, in Alcoutim, in the Algarve.
