Portugal sets 'important' new renewable energy record ...

What are Portugal's renewable energy goals? Portugal is aiming to generate 85 per cent of its electricity from renewable sources by 2030. It hopes to decommission all of its natural gas-fired

Portugal's Renewable Energy Revolution: A Bright Future Ahead

The country has emerged as a leader in renewable energy, with solar energy contributing to 73% of national consumption. The remarkable increase in renewable energy generation reflects not only the growing capacity of Portugal's infrastructure but also a societal shift toward sustainability.

Government approves ambitious package to accelerate energy ...

Among the main measures approved we note the revision of the National Energy and Climate Plan (PNEC 2030), which boosts the country's ambition for the coming decade. The plan sets a rise in the use of renewables, setting a target of 51% of renewables in the final energy consumption by 2030.

The Industry & Energy Transition Index: Portugal

Europe, including Portugal, has experienced a

deindustrialization wave and overall loss of competitiveness in recent decades. The energy transition, however, presents a real opportunity to reignite growth and reindustrialize the economy, and Portugal is well positioned to become a "speedboat," leading the way within Europe's economic plan.
