Project solar Croatia

Croatia to add 1,200 MW of solar, wind in 2024

Croatia is set to put online a total of 1,200 MW in solar and wind power capacity in 2024, State Secretary in the Ministry of Economy and Sustainable Development Ivo Milatic said on the sidelines of the II Regional Conference RE-Source Croatia Hub 2024, dedicated to the development of power purchase agreements (PPAs).

Greener Croatia aims to cut emissions, secure energy supply

HEP has a key role in leading Croatia's transition to low-carbon energy. Apart from the onshore wind farm, it is also developing five small solar photovoltaic plants (22 megawatts in total) in southern parts of Croatia, Split-Dalmatia, Zadar, Istria ...

EBRD, European Investment Bank fund 99 MW of solar ...

The European Bank for Reconstruction and Development (EBRD) and the European Investment Bank (EIB) are funding a 99 MW solar project in southwestern Croatia with a total investment of EUR62

We have secured land on three solar projects in Croatia

Croatia's solar capacity grew almost 50% from 224 MW to 305 MW in the first six months of

2023. With such a limited capacity currently in situ in the region, Hive's projects will massively support the green transition and ...

HEP RENEWABLE ENERGY CROATIA

The EIB's investment in the project will support the deployment of new renewable energy capacity in Croatia, crucial for the achievement of the 2030 targets set out in the final National Energy and Climate Plan.

RP Global plans 50-MW solar project in Croatia

European renewables developer RP Global plans to build a 50-MW/65.6-MWp solar farm in southern Croatia, the ministry of economy and sustainable development of that country said after receiving the amended environmental impact assessment for the project.

ACCIONA Energía awarded 'Contract for Difference' for a new PV ...

Promina will be built in the Sibenik-Knin county in southern Croatia and will be the largest solar plant in the country upon commissioning in 2027. It will have more than 300,000 photovoltaic ...

RP Global plans 50-MW solar project in Croatia

European renewables developer RP Global plans to build a 50-MW/65.6-MWp solar farm in southern Croatia, the ministry of economy and sustainable development of that country said after receiving the amended ...

HEP RENEWABLE ENERGY CROATIA

The EIB's investment in the project will support the deployment of new renewable energy capacity in Croatia, crucial for the achievement of the 2030 targets set out in the final ...

EBRD supports green energy transition in Croatia

This project, set to become the largest solar power plant in HEP's renewable energy portfolio, underscores the pivotal role of renewables as a sustainable pathway for replacing fossil fuels. The Korlat solar power plant ...

ACCIONA Energía awarded 'Contract for Difference' for a new PV ...

Promina will be built in the Sibenik-Knin county in southern Croatia and will be the largest solar plant in the country upon commissioning in 2027. It will have more than 300,000 photovoltaic modules that will produce 320GWh, enough to meet the energy needs of 69,000 households, which will reduce CO 2 emissions by 140,000 tonnes a year.

Croatia to add 1,200 MW of solar, wind in 2024

Croatia is set to put online a total of 1,200 MW in solar and wind power capacity in 2024, State Secretary in the Ministry of Economy and Sustainable Development Ivo Milatic said on the sidelines of the II Regional ...

The European Bank for Reconstruction and Development (EBRD) and the European Investment Bank (EIB) are funding a 99 MW solar project in southwestern Croatia with a total investment of EUR62

We have secured land on three solar projects in Croatia

Croatia's solar capacity grew almost 50% from 224 MW to 305 MW in the first six months of 2023. With such a limited capacity currently in situ in the region, Hive's projects will massively support the green transition and growth of photovoltaic development across the ...

EBRD supports green energy transition in Croatia

This project, set to become the largest solar power plant in HEP's renewable energy portfolio, underscores the pivotal role of renewables as a sustainable pathway for replacing fossil fuels. The Korlat solar power plant will contribute significantly to the country's achievement of its renewable energy targets by 2030.

First EBRD loan to support solar power in Croatia with InvestEU

The first European Bank for Reconstruction and Development (EBRD) project with the InvestEU programme, designed to support sustainable economy projects, will finance the construction of 30 MW of new solar generation capacity in Croatia. It is the Bank's first solar photovoltaic (PV) project in the country.

Greener Croatia aims to cut emissions, secure energy ...

HEP has a key role in leading Croatia's transition to low-carbon energy. Apart from the onshore wind farm, it is also developing five small solar photovoltaic plants (22 megawatts in total) in southern parts of Croatia, Split ...

Croatia's solar streak marred by 4-year finalization waiting times

According to the lobby group's internal data, Croatia is on track to reaching 418 MW of installed capacity by the end of the month, with 2 GW of solar projects in the pipeline, she said.
