### Vision 2030: The way forward for clean energy transition in India

Three COPs and just three years later, there are signs of remarkable progress made by the country as it transitions towards clean energy sources. India's renewable energy capacity has expanded by an impressive 54 GW to reach 203.22 GW as of October 2024, which translates to almost 45 per cent of the entire installed power capacity of the country.

### India's Renewable Energy Sector Attracts Record Investment in 2023

2 · A new report by the Centre for Financial Accountability reveals that project finance flowing into India's renewable energy sector surged by 63% in 2023, reaching Rs 30,255 crore (\$3.66 billion) compared to 2022 figures. The report, titled 'Coal vs RE Investment in 2024', highlights that while project finance lending to renewable energy

### Renewable energy accounted for 71 per cent of India's ...

In India during FY 23-24, renewable energy (RE) contributed more than 70 per cent of the 26 GW (GigaWatt) of new power generated in the country. India's total installed energy capacity has now reached 442 GW, with RE comprising ...

### RE ENERGY FZE Company Profile
