

Real-time detection of solar container station equipment

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled

Overview

Continuous, solar-supported locating of your non-powered objects with exact start/stop times makes the difference. This enables real-time scheduling, downtime analyses and delay warnings (ETA monitoring). A wide range of energy-efficient telematics modules for all logistics. When your assets are under exposure in sunlight, solar powered GPS tracker does it work for sustainable power while tracking its location. However, in a recent industry & business talk, one comment stood out: “Customers aren’t asking where the container is. They’re asking what ‘s happening to it.”. ORBCOMM’s dry container solution helps shipping lines and their customers gain visibility and traceability so they can turn real-time data into decisions about their maritime operations. The solution provides end-to-end monitoring for dry marine containers moving through complex supply chains. Strengthen security measures and protect valuable assets with continuous container visibility, door-open and shock detection, ensuring the safety and integrity of your customers’ cargo. Monitor and track inland movements in real-time, enabling timely response to disruptions or customer queries. With SOLAR, you can see the live location of your equipment at all times. What equipment is SOLAR suitable for?

The SOLAR Tracker is ideal for a wide range of devices and assets. Its robust design and solar-powered autonomy make it versatile and reliable for different applications. SOLAR is ideal. The mecSOLAR series is one of the most versatile asset tracking solutions in the world designed in cooperation with mecomo partner. Continuous, solar-supported locating of your non-powered objects with exact start/stop times makes the difference. This enables real-time scheduling, downtime analyses. ZIM Integrated Shipping Services Ltd. (ZIM) is speeding the global deployment of smart containers, increasing visibility and transparency by integrating Hoopo’s hoopoSense Solar trackers. ZIM’s smart container system reportedly offers end-to-end tracking, including the inland leg, providing clients.

Real-time detection of solar container station equipment

SOLAR: Solar-powered tracking container , syniotec

Live GPS location: real-time tracking of the container's position. Movement alarms: Notifications when the container starts or stops moving. Battery status: Monitoring of battery life to ensure uninterrupted ...
