Renewable energy colours the Greenlandic geographical map ...

Greenland's magnificent nature provides Nukissiorfiit (Greenland's energy company) with some unique opportunities to produce renewable energy for their customers. By 2020, 71% of the energy Nukissiorfiit produced for the 17 towns and 53 settlements it serves was green energy from solar, wind, and hydroelectric power sources.

Sustainable energy transition of Greenland and its prospects as a

Greenland's transition from a fossil fuels-based system to a 100% renewable energy system between 2019 and 2050 and its position as a potential e-fuels and e-chemicals production hub for Europe, Japan, and South Korea, has been investigated in this study using the EnergyPLAN model.
