

Shared solar container project application requirements

Overview

Each of the links below will provide additional information and access to applicable rules, statutes, application forms and resources. An applicant may choose to be licensed in more than one utility service territory provided the solar facility and customers are located within the same utility service territory. ARE SUBSCRIBER ORGANIZATIONS LICENSED PRIOR TO JANUARY 1, 2025, AUTOMATICALLY AUTHORIZED TO CONDUCT BUSINESS IN APCO'S. Any SOs interested in submitting a shared solar facility to be considered for participation in the program must provide the following information: Email required documentation to sharedsolar@dominionenergy.com. The following Schedule SS - Shared Solar and Schedule SO-SS tariffs provide pricing. Community shared solar programs enable members of a neighborhood or community to pool resources and share the benefits of a single solar installation. Everyone can participate—even renters, Installation, design, and permitting for solar energy systems. The DOE SunShot Initiative is a collaborative. In a community shared solar (CSS) program, a large solar photovoltaic (PV) system provides power or financial benefit to multiple community members. CSS programs can expand access to solar power for renters, those with shaded roofs, and those who are unable to install a solar system on their home. This section describes the compliance requirements for solar photovoltaic (PV) systems, solar readiness, battery storage systems, and community-shared solar electric generation and/or storage systems for newly constructed multifamily buildings. For information about solar water heating system. Shared solar projects allow customers that do not have sufficient solar resource, that rent their homes, or that are otherwise unable or unwilling to install solar on their residences, to buy or lease a portion of a shared solar system. The participant's share of the electricity generated is.
