### OxDrive

OxDrive specializes in the development of fully integrated electric hubs, known as OxDrive e-hubs, designed for off-highway electric vehicles. These e-hubs combine motor, transmission, controller, and brake into a single compact unit, streamlining the driveline elements and providing reliability and performance.

### About Us

OxDrive specialises in the design and manufacture of robust, integrated, electric drives for off-highway use, including agritech, construction and more. The need for 'one box' integrated units with gearbox, motor, motor controller and brake was identified whilst the OxDrive founders were leading the design & development of fully autonomous

### OxDrive uses Inngot IP audit to help plan its IP strategy

OxDrive has implemented strategies to manage its IP more effectively, clarified the ownership of its trade marks, and created a register of its intangible assets and trade secrets. OxDrive utilises the report in its Investor Data Room, and quotes a formal, coherent and coordinated IP plan in its strategic growth model.

### OxDrive Ltd

OxDrive produces in-wheel electric drive (e-hubs) designed and manufactured specifically for the

needs of Agritech, construction and associated electric off-highway applications. Unique in their durability, torque and compact size, OxDrive e-hubs offer the very best performance whilst reducing R& D and component cost.

### OxDrive Ltd

### OxDrive - OxDrive Fully Integrated Electric Hubs

OxDrive e-hubs provide the speed, torque and durability needed for the exciting new generation of electric off-highway vehicles. Our e-hubs have been designed as an integrated solution, engineered to operate over extended periods in demanding environments.

### Chris Horton, Author at Performance Projects

1/2/22 - OxDrive announced. Performance Projects would like to announce the formation of OxDrive Ltd. Specialising in the supply of integrated, rugged, high torque drivelines for agritech, construction and more, OxDrive Ltd is the result of the £0.5m Innovate UK backed collaborative project lead by Performance Projects.

## OxDrive Ltd

OxDrive is a leading supplier of extremely durable, high torque electric hubs (e-hubs) for agritech use. OxDrive e-hubs range from 250Nm to 3200Nm, and are unique in their full integration of motor, motor controller, gearbox and park brake.

## Products - OxDrive

OxDrive products are centred around our range of high torque, robust, wheel drive units. The OxDrive e-hub family is a range of fully integrated drivelines for off-highway use, including agritech, construction and more.
