## Overview

---

A solar shipping container is actually a portable, self-contained solar power station. It has photovoltaic panels, energy storage, inverters, and monitoring systems all housed in a single container. These homes are flexible, with layouts that range from simple single-container builds to larger, connected designs. Using recycled materials adds to their eco-friendly appeal and helps cut down on waste. Conexwest makes it easy with tough, solar-ready containers, fast delivery, and full support. We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. Increase your energy capabilities with our compact and powerful 20ft Solar Energy Container construction. Designed to be strong and mobile, it offers 140kWh per day, thanks to its 60 m<sup>2</sup> solar array and 50 kWh battery storage. It's a rapid-deployment energy solution that starts powering your needs in. This cleverly reimagined shipping container provides a sustainable 132 sq. ft. living space featuring one bedroom and one bathroom on a single story. The vibrant blue exterior stands out amidst the natural landscape, while solar panels and a wind turbine on the roof power this innovative retreat. We are a family owned and operated container home builder. Using a combination of 20- and 40-foot containers, we create unique, functional, and modern structures. We are a family owned and operated container home builder. Using a combination of 20- and 40-foot containers, we create unique. By integrating solar panels into a portable container format, these systems provide an efficient means of generating renewable energy, making them ideal for diverse applications ranging from disaster relief to off-grid living. Solar containers operate by converting sunlight into electricity through.
