## Smart energy international Tunisia

---

### Tunisia STEG's vast smart meter project could trip

It should be followed by the roll-out of nearly five million smart meters across the country to make Tunisia the first country in Africa to have a nationwide smart metering system. The national electricity company is counting on the project to reduce the number of power shortages and to better manage billing.

### Smart Energy International

4 · Smart Energy International is the leading authority on the smart meter, smart grid and smart energy markets, providing up-to-the-minute global news, incisive comment and professional resources.

### Sia Partners to support Tunisia's smart grid ...

This global transformation is a major step in the modernization of the energy market and networks of Tunisia, and a key lever to accelerate the energy transition in the country. STEG's Smart Grid project is also an ...

### Tunisian utility selects Huawei for smart meter rollout

The deployment of the advanced metering infrastructure (AMI) will be the first rollout of smart electric meters in Tunisia. The

development will ensure STEG optimises its revenue collection process through accurate billing as well as reduce electricity theft as a result of meter tampering.

### Sia Partners to support Tunisia's smart grid transformation for ...

This global transformation is a major step in the modernization of the energy market and networks of Tunisia, and a key lever to accelerate the energy transition in the country. STEG's Smart Grid project is also an opportunity to strengthen its positioning and international development, making STEG a reference in Africa.

### E3 International to Implement Smart Grid Program in Tunisia

E3 International will work with the Government of Tunisia (GoT) and the STEG to accelerate its energy efficiency through the deployment of a pilot for advanced smart grid technology.
