Smarter energy solution co ltd Finland

SMART ENERGY

A combination of groundbreaking renewable energy technology, smart networks and automation has made Finnish smart energy solutions among the most advanced in the world. According to the Finnish Ministry of Economic Affairs and Employment, 40% of Finnish energy comes from renewables.

70 Top Energy Companies in Finland - December 2024 , F6S

4 · We provide smart energy solutions for monitoring energy consumption, controlling, storing, and optimizing renewable and non-renewable energy. The provided solutions can be divided into the following products/services: energy storage, smart light switches, smart power plugs and power sensors.

Smart energy systems

We design smart energy systems for companies, industrial parks and residential blocks. Local energy solutions also include sustainable transport modes, such as electric cars and electric bikes. Local energy systems facilitate demand-side management. Increasing our energy consumption efficiency requires energy to be locally recycled.

Smart Energy

Finland's expertise in smart energy is based upon a variety of complimentary factors: a

history of using renewable energy, strong support from society and public officials, rare natural resources, world-class research and an innovative private sector. The Finnish state has pledged EUR100 million to the Smart Energy Finland

Etusivu

Smart Energy Finland Oy on vuonna 2022 perustettu yhtiö. Yhtiön toimialaa ovat uusiutuvan energian sekä sähkönjakelutekniikan tutkimus ja kehittämissuunnittelu-, konsultointi- ja projektinjohtamispalveluita sähköverkkoyhtiöille ja saman toimialan rakennusurakoitsijoille.

SMART ENERGY Finland

allowing efficient, clean, and reliable off grid energy generation. It can help us sharply reduce our use of polluting fuels, moving from coal to cleaner fuel sources, and eventually to renewably generated hydrogen. The implications are huge for power distribution, for energy bills, and most importantly for the environment.
COMPETITIVE ADVANTAGE

SMART ENERGY

o Finland has extremely stable electricity grid with minimal losses.
o One of the most advanced smart grid in the world
o Smart grid functionalities such as load profiling, real-time billing, distributed power generation are already in use
o Internationally open Smart Otaniemi and Åland Island test beds for smart grid 2.0
