### **Dominovas launches first Rubicon SOFC project in South Africa**

US-based Dominovas Energy Corporation has launched its first Rubicon(TM) solid oxide fuel cell system in Johannesburg, South Africa. The company says that this 50 kW ...

### **Global Solid Oxide Fuel Cell**

For instance, Euro 7 emission norms were implemented in 2020, with a CO2 emission target of 95 grams per kilometer. Such clean energy norms create demand for Solid Oxide Fuel Cells (SOFC) that plays a major role in energy decentralization by producing quiet, clean, and efficient energy, particularly in stationary power generation.

### **Dominovas secures gas supply for SOFC units in South Africa**

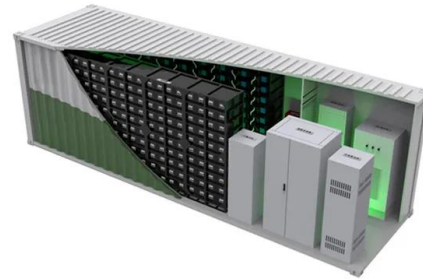

Dominovas had originally planned to run its SOFC system on liquefied petroleum gas (LPG), but logistical and supply obstacles led the company to instead secure a ...

### **Dominovas launches first Rubicon SOFC project in South Africa**

US-based Dominovas Energy Corporation has launched its first Rubicon(TM) solid oxide fuel cell system in Johannesburg, South Africa. The

company says that this 50 kW Rubicon 'proof of concept' unit will be the first SOFC system to serve baseload capacity anywhere on the African continent.

### Dominovas secures gas supply for SOFC units in South Africa

Dominovas had originally planned to run its SOFC system on liquefied petroleum gas (LPG), but logistical and supply obstacles led the company to instead secure a sustainable, economical, and available fuel source for delivery of natural gas.

### Dominovas Energy Launches the First Rubicon(TM) SOFC Project

The 50kW RUBICON(TM) produce over 430,000 kilowatt hours of clean, fuel cell generated electricity each year. The 50kW RUBICON(TM) proof of concept "showcase" unit will be the first solid oxide fuel cell (SOFC) unit to serve baseload capacity anywhere on ...

Single Phase Hybrid

- 5 Year Warranty Period
- 5 Year Global Leading Inverter Brand
- Top 3 World Single Phase PV Inverter Supplier

### The Industry's First Scalable Single Megawatt SOFC System

With our proprietary, modular design of the first, true scalable, single megawatt system, we have taken the requisite steps to ensure the reliable and consistent manufacturing and delivery of multi-megawatt RUBICON(TM) systems on a global scale.

## Dominator Energy Launches the First Rubicon(TM) SOFC

By August of this year, Dominator Energy will have the first RUBICON(TM) SOFC unit operating in sub-Saharan Africa -- more than a year in advance of the commercial ...

### INTEGRATED DESIGN

EASY TO TRANSPORT AND INSTALL,  
FLEXIBLE DEPLOYMENT

## Dominator Energy Launches the First Rubicon(TM) SOFC

By August of this year, Dominator Energy will have the first RUBICON(TM) SOFC unit operating in sub-Saharan Africa -- more than a year in advance of the commercial operations date (COD) for our

## The Industry's First Scalable Single Megawatt SOFC System

## Dominator Energy Corporation Launches the First RUBICON(TM) SOFC System ...

Dominator Energy Corporation announced the launch of the first RUBICON SOFC system in Johannesburg, South Africa. Launched in partnership with the South Africa-based Edison Power Group, the 50kW

## Large Stationary Solid Oxide Fuel Cell (SOFC) Power Plants

The company launched its first RUBICON(TM) SOFC system in Johannesburg, South Africa. Launched in partnership with the South Africa-based Edison Power Group (EPG), the 50 kW RUBICON(TM) system will serve as a demonstration unit for future Edison Power Group sponsored multi-megawatt, utility-scale deployments in Africa [ 8 ].

## Global Solid Oxide Fuel Cell

For instance, Euro 7 emission norms were implemented in 2020, with a CO2 emission target of 95 grams per kilometer. Such clean energy norms create demand for Solid Oxide Fuel Cells (SOFC) that plays a major role in energy ...
