Solar bess French Southern Territories

Co-location of solar PV and BESS shape SEE's solar energy future

As the region advances, it's becoming increasingly clear that co-located solar PV and battery storage will define the new standard for solar energy projects.

Roundup: Legal challenge dropped, Sungrow and SSE plan BESS

Sungrow, a manufacturer of PV inverters and energy storage systems, has agreed to provide SSE Renewables with 320MW/640MWh worth of its PowerTitan liquid-cooled battery energy storage system (BESS) units for its Monk Fryston project in the north of England.

Sungrow, a manufacturer of PV inverters and energy storage systems, has agreed to provide SSE Renewables with 320MW/640MWh worth of its PowerTitan liquid-cooled battery energy storage system (BESS) units for its ...

Battery StorageTech Bankability Ratings Report

PV Tech Research's Battery StorageTech Bankability Ratings Report provides insights and risk analysis on the leading global battery energy storage systems (BESS) suppliers serving the

utility scale renewables market. Released quarterly, the report offers in-depth visibility on suppliers to help guide purchasing decisions.

Saft supplying BESS to France's first grid-connected colocated solar

Saft will provide a modular, plug-and-play 8MW/8MWh BESS to Neoen's solar PV project in Antugnac, southern France. The battery storage will perform frequency regulation ancillary services for the grid of national transmission operator RTE after Neoen won a seven-year contract through RTE's AOLT tender process.

The role of BESS in keeping the lights on

If we want a resilient, forward-looking energy system, NESO and regulators must stop treating BESS as a backup plan and start making it a pillar of the UK's energy strategy. With the right policies, BESS can provide the robust, flexible support our grid urgently needs, ensuring the lights stay on.

Voltalia turns on 10.6MWh battery storage in French Guiana

French renewable energy company Voltalia has completed the expansion of a renewable energy plant in French Guiana, adding a battery energy storage system (BESS) of 10.6MWh. The Paris-listed company announced the commissioning of the Sable Blanc solar-plus-storage project

yesterday (10 May).

France's largest battery storage facility

RTE is conducting a pilot project, called Project RINGO, which will see just under 100MWh of battery storage deployed across three French sites that act as virtual transmission assets. Many of France's island territories ...

As the region advances, it's becoming increasingly clear that co-located solar PV and battery storage will define the new standard for solar energy projects.

UK's Harmony Energy to build France's largest BESS

Developer Harmony Energy is set to build a 100MW/200MWh battery energy storage system (BESS) project in France, the country's largest. The company will deploy Tesla Megapacks for the 2-hour 'Cheviré' project in ...

UK's Harmony Energy to build France's largest BESS

Developer Harmony Energy is set to build a 100MW/200MWh battery energy storage system (BESS) project in France, the country's largest. The company will deploy Tesla Megapacks for the 2-hour 'Cheviré' project in Nantes Saint-Nazaire Harbour, western France, the first large-scale 2-hour system in the country, Harmony said.

French renewable energy company Voltalia has completed the expansion of a renewable energy plant in French Guiana, adding a battery energy storage system (BESS) of 10.6MWh. The Paris-listed company announced ...

SSE Renewables starts construction of 320MW BESS

Construction of the Monks Fryston BESS officially started yesterday (8 October), as confirmed by a ceremony that included project partners Morrison Energy Services and Sungrow, the energy storage supplier, along with SSE Renewables. The BESS aims to energise in early 2026 after SSE made a final investment decision on the project in November 2023.

France's largest battery storage facility

RTE is conducting a pilot project, called Project RINGO, which will see just under 100MWh of battery storage deployed across three French sites that act as virtual transmission assets. Many of France's island territories overseas have sizeable battery storage systems paired with solar PV plants and the country has pioneer low carbon capacity

SSE Renewables starts construction of 320MW BESS
