

Solar container industry suspends announcements

Overview

This year has been rough for climate technology: Companies have canceled, downsized, or shut down at least 16 large-scale projects worth \$8 billion in total in the first quarter of 2025, according to a new report. Battery, solar, and wind projects are getting killed in record numbers. Here's a map of all the cancellations so far this year. This story is part of MIT Technology Review's "America Undone" series, examining how the foundations of US success in science and innovation are currently under threat.
