

# **Solar container inverter sgs certification quotation**

## Overview

---

Our PV module certification services provide you with photovoltaic module testing and certification to ensure that your modules meet the required international standards and confirm quality testing by an independent third party. Why choose PV module certification from SGS?

. Photovoltaic (PV) module certification from SGS – PV module testing and certification to ensure that your modules comply with international standards. PV modules must meet a range of regulations and standards before they can be considered suitable for sale and for renewable energy funding programs. SGS is the world's leading inspection, verification, testing and certification company. SGS is recognised as the global benchmark for quality and integrity. With 80,000 employees, SGS operates a network of over 1,650 offices and laboratories around the world. As a result, our expertise provides a. S opened its solar doors in Germany. It is a world wide, dynamic and innovative market. The leading supplier industry, the high concentration of importer, retailer and power pl careful follow-up on the operation. The target group includes investors, business developers, insurance companies. The range of services offered by SGS throughout the project life cycle minimise the total risk of your photovoltaic (PV) project. Subscribing to the logic that the earlier risks are detected, the earlier effective countermeasures can be implemented, SGS engages in PV projects starting at the. However, harnessing, generating and distributing solar power requires a high level of technology and significant financial investment. SGS offers assessment, verification, testing and support services throughout the entire life of solar energy projects, from the conceptual phase to design. Tailored services for solar photovoltaic projects throughout the value chain SGS offers highly specialized analysis, inspection, testing and certification for solar PV projects, from conception through commissioning. We will enable you to identify risk at an early stage and implement timely.
