

Solar container project bonus

Overview

Any project that meets domestic content requirements receives a 10 percent increase in the per-kilowatt-hour credit amount, regardless of size or labor compliance. The math looks straightforward, but eligibility depends on detailed IRS definitions of what counts as “manufactured in. At its simplest, the domestic content bonus boosts the value of federal clean energy tax credits when projects can prove enough of their equipment is manufactured in the United States. For projects using the Investment Tax Credit (ITC), the bonus can raise the credit rate by 10 percentage points. A. The US Treasury updated a table last week that is used to calculate the domestic content of solar, onshore wind and storage projects to determine whether they qualify for bonus tax credits. The updated table is in Notice 2025-08. The updated table applies to domestic content calculations starting. The Domestic Content Bonus Credit is a powerful incentive for businesses to support U.S. manufacturing while investing in solar projects. It provides a 10% bonus tax credit on top of the existing 30% Investment Tax Credit (ITC) for projects that meet specific criteria for using U.S.-made materials. 2022: The Inflation Reduction Act is signed into law, which includes a 10% domestic content bonus credit for projects that satisfy requirements for domestically manufactured materials. 2023: The IRS and Department of the Treasury issued initial guidance for bonus credit qualification requirements. The U.S. Department of the Treasury released additional guidance on the Inflation Reduction Act’s domestic content tax credit bonus for solar and battery energy storage projects. The guidance today builds on the domestic content safe harbor that Treasury and the IRS published in May of 2024, which. The IRS has recently introduced new guidelines that simplify the process for qualifying for a 10% bonus tax credit, which is important for companies in our industry. Let’s break down what this means for developers, investors, and the future of solar energy in America. Understanding the New Elective.
