A 'Sunflower' that Generates Energy

The Smartflower is a fully automated solar energy generation system designed to look like a flower: Its 'petals' are large solar panels that automatically unfold when the sun rises every day and face the sun at a 90-degree angle to produce electricity; at sunset or in high winds that reach a speed of at least 30 miles (48 kilometres) per

Smartflower Efficiency, Cost, Installation, Alternatives

The Smartflower, or Solar Sunflower, is a blend between solar panels and art. It is a photovoltaic (PV) system that has been incorporated to bring visibility to solar technology, and at the same time to enhance the landscape and architecture they complement via aesthetics.

??

Far from a figment of imagination, it is a recent artistic innovation, namely the Smartflower (or the 'solar flower') manufactured by a US-based company of the same name, that generates up to 40 percent more renewable energy than traditional stationary solar panels.
