It works by both pull monitoring data (Via the RS232 or USB port on the Inverter) and sending to Home Assistant via MQTT, as well as actually programatically receiving commands (again via MQTT) to change the configuration of the Inverter on the fly - Depending on various automations you might setup (such as 'only charge batteries off solar

Best hybrid inverter for solar/battery system

I am looking at a solar installation with battery system and want to ensure compatibility with HA. What works well (locally if possible) and reliably? I've been recommended a Growatt based sph5000.

SolaX Power

The solax integration connects Home Assistant to Solax solar power inverters. Solax inverters may be connected to a home Wi-Fi network and expose a REST API. This integration retrieves information such as photovoltaic power production, battery levels and power, and how much power is being fed back into the grid.
