### Photovoltaic plant subsidies in Czechia

Approximately 12.3 % of electricity in the Czech Republic is produced from renewable sources, while roughly 2.5 % comes from photovoltaic power plants (PV plants). The Czech grid operator, CEPS, expects PV plant installations in Czechia to more than quadruple to approx. 10,000 MWp of the total installed base by 2030.

### Czechia sinks EU cash into domestic green energy

A total of CZK 32 bn (EUR 1.27bn) will go to photovoltaics, and of this, CZK 20bn to family and apartment buildings from the New Green Savings Programme. This equates to some 125,000 new solar power roof panels for family houses, and companies will receive CZK 12bn crowns. CZK 10bn has been earmarked since mid-February.

## Solar Power Becomes More Affordable in the Czech Republic

In the Czech Republic, the availability of photovoltaic power plants for households has never been better. According to pwXchange, the wholesale price of solar panels has halved since December 2022. Those who install a typical rooftop power plant can now save up to a hundred thousand crowns compared to the previous year. The prices of [...]

## Balcony Solar Panels Can Save Households Thousands

According to Marcek, Maycon sells only dozens of balcony photovoltaics monthly in the Czech Republic. Datart, which has been offering these power plants for three months, has so far delivered only a few pieces, according to Tomáš Krnávek, head of the company's accessories department.

## Unlocking Energy Savings: Czech Republic's New Green

The program called "New Green Savings" (Nová zelená úsporám or NZÚ) offers financial support for a wide range of projects aimed at saving energy. The subsidies are not limited to solar panels or heat pumps, as commonly believed.
