Application scenarios of energy storage battery products

## Overview

---

Household owners who consume more than 6,000 kWh (units) per year are charged at tariff rates that range from EUR 0.16 to over EUR 0.60 per unit consumed. These billing rates are considerably higher than the presently available EUR 0.105 / kWh feed-in tariff for energy generated by photovoltaic systems and.

Virtue Solaris offers its clients a range of unique battery energy storage solutions based on high voltage lithium ion batteries produced by renowned electronics manufacturers such as Sungrow and Huawei. These batteries.

Government incentives are also available for battery storage solutions. As from 2024, the government offers a grant of up to EUR 7,200 for the.

One major advantage of a home energy storage system is that it can provide backup power during power outages. Once a power cut occurs, our smart backup system immediately transfers available solar power or.

### Photovoltaic Panels and Battery Systems

In Malta the grid belongs to Enemalta Corporation. With an on-grid system, there is an option to add an energy storage system (known as a battery system). The electricity generated by the PV system will either be consumed by the household or sold to the grid.

### Your Energy Since 1989

Our passion for renewable energy started back in 1989 when we installed the first solar panels at the University of Malta. As the renewable energy sector has evolved, we have kept in touch with the latest technology, and our latest PV systems now come with batteries that enable households to become more self-sustaining.
