Growth Potential of Solar Photovoltaics in Guadeloupe

Solar photovoltaic power (with storage): an additional 52 MW by 2023. Solar photovoltaic installations with utility-scale storage (more than 100 kW p): an additional 37 MW produced mainly through RFPs put out by the Regional Energy Commission for non-interconnected zones

Regulatory Framework

Restrictions on solar photovoltaic installations, with strict prohibition on installations generating more than 1.5 MW that lack a storage system; Allocation of quotas for power not subject to grid-balancing regulations between three variable renewable energy sources: ground-mounted solar photovoltaics, rooftop solar photovoltaics, and wind

French island tenders push down solar-plus-storage prices by ...

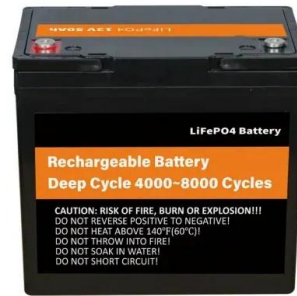

Tenders for solar-plus-storage projects on French island territories including Corsica, Guadeloupe and Martinique have resulted in winning bids often 40% lower than the victors of previous reverse auctions. France's ministry of ecology, sustainable development and energy released results of two tenders late last week.

Solar and Storage successful examples on Islands

Reuniwatt, Naldeo Technologies & Industries and

the innovation cluster of Guadeloupe Synergîle are pleased to invite you to their joint webinar. This webinar will deal with photovoltaic power plants with storage and forecasting and discuss successful examples for energy transition on islands.

Albioma Commissioning Of The Photovoltaic Power Plant With Storage ...

Albioma announces the industrial commissioning, on 28 June 2019, of the Sainte-Rose photovoltaic power plant in Guadeloupe, with a capacity of 3.3 MWp. A plant with innovative storage (GLOBENEWSWIRE) - This plant won the 2015 Energy Regulation Board (CRE) tender for the construction and operation of photovoltaic solar power plants with energy

Solar Photovoltaics

Growth Potential of Solar Photovoltaics in Guadeloupe The PPE's Objectives for Solar Photovoltaics The regional government's solar photovoltaics policies have several objectives: Ensure non-disruptive, coordinated, and managed development of solar photovoltaics that achieves a balance between sub-sectors [...]
