## Solar water heater for home Jersey

### Solar Thermal - Isle Eco Jersey

Solar water heating systems use solar panels, called collectors, fitted to your roof. These collect heat from the sun and use it to heat up water which is stored in a hot water cylinder. A boiler or immersion heater can be used as a back-up to heat the ...

### Solar Water Heating

In summer, Jersey households with modest hot water needs can rely entirely on solar power. In the winter, your solar system can complement your existing boiler, or you can configure boost schedules using the app for increased flexibility. When you're away for an extended period, you can easily deactivate the hot water function via the app.

Test certification  
CE, FCC
