

# **Solar wind power plant Guernsey**

## Solar wind power plant Guernsey

---

### Guernsey Could Make Millions From Wind Farm

The detailed reports, published today, give the green light to a large-scale wind farm off the south west coast between the 6-12 mile limit, producing more power than the two reactors at nearby Flamanville nuclear power station. Solar is also seen as a goer, with recommendations to ease planning restrictions on domestic rooftop panels and the

### Renewable Energy

Wind power, solar, tidal, biomass, and heat pumps are among a few technological options that comprise the renewable energy industry. These technologies may be implemented by small, medium and large companies and projects and installation may vary on scale and terms of their environment.

### Undersea cable and renewables in Guernsey electricity plan

An alternative proposal would see the island pursue solar but not wind power generation. Guernsey's environment committee has recommended the States look at building an undersea electricity

### Guernsey alternative energy plan put forward by 14 deputies

Building a windfarm off Guernsey's coast could

reduce bills and make millions of pounds through renewable energy, a report has found. Reports into how solar, tidal and wind energy could

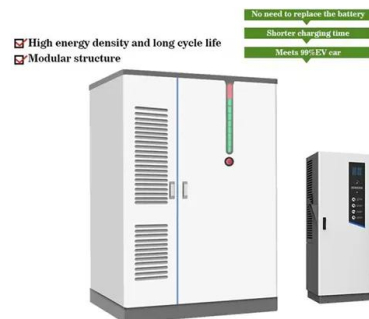

### Wind favoured, but solar potential huge , Guernsey Press

The report estimates that Guernsey currently has installed two megawatts of solar PV and one MW of battery energy storage, and this could be increased by 150 fold in 15 years to 300MWs, which would account for about half to a third of the islands electricity needs.

Building a windfarm off Guernsey's coast could reduce bills and make millions of pounds through renewable energy, a report has found. Reports into how solar, tidal and wind energy could benefit

### Alderney "working together with Guernsey" on renewable energy

Alderney Representative Steve Roberts insisted that the island remains interested in tidal power and other renewable energy projects as deputies in Guernsey questioned why progress was not being made more quickly.

## 'Solar power is a quicker fix and is the way to go'

A group of deputies came out this week in support of pursuing solar and especially wind power. Environment & Infrastructure also has established an energy partnership to shape the electricity strategy, deliver aims of its energy policy, and help to secure clean and affordable energy for the island's future, and said the work was 'powering

## States of Alderney calls for proposals on tidal power

It said tidal energy could complement other solar and wind projects. Tidal power relies on water flowing back and forward with the tides to turn turbines and generate electricity.

## Solar farm gets go-ahead on former Fresh Guernsey Herbs site

'The development is of a significant scale in the context of Guernsey for solar, with available land for large scale projects being limited,' he stated in the planning report. 'It is understood that we are approximately 50% of the way to the 2025 target of 5MW total installed solar within the island, and the development of this project would enable the achievement of ...
