Home page

New regulatory incentives, slumping costs and need for grid resiliency are driving demand for more energy storage. Whether it's Georgia Power or Duke Energy's decarbonization plans, or the anticipated 6.2 GW of storage by 2030 in regions like SPP and MISO, Energy Storage Summit South will be where the future unfolds.

PIME ENERGY SUMMIT 2023

What can be done to increase the economic efficiency of energy storage facilities? Which technologies will dominate the energy storage market? What system solutions in the field of cooperation with DSOs should be introduced to make it easier to connect RES installations with energy storage facilities?

Agenda

As federal-set targets increase the need for energy storage on our grids, how can utilities benefit from energy storage technologies, and what learnings can be taken from existing projects. Attend this dialogue-led session to understand the interests of utilities and how the energy storage sector should respond.
