

Spain rivus batteries

Spain rivus batteries

A Green Solution for Energy Storage

Large-scale batteries are urgently needed to store renewable energy - it's not always windy and sunny when we need it to be. Rivus' vision is to add a critical element to the global energy transition away from fossil fuels to predominantly renewable energy.

Rivus Batteries: Innovating a Sustainable Energy Future ...

Rivus Batteries operates in the increasingly important field of energy storage, focusing specifically on stationary applications with Organic Flow Batteries. Its approach aims to offer a more sustainable and cost-effective alternative to ...

Rivus Batteries: Innovating a Sustainable Energy Future with ...

Rivus Batteries operates in the increasingly important field of energy storage, focusing specifically on stationary applications with Organic Flow Batteries. Its approach aims to offer a more sustainable and cost-effective alternative to traditional energy storage technologies.

Rivus Batteries

Rivus Batteries is pioneering sustainable energy storage with its innovative, metal-free flow battery technology utilizing water-based organic electrolytes. The company focuses on reducing

costs and environmental impact, offering a ...

InnoEnergy portfolio company, Rivus Batteries, raises half a million

The organic flow battery company Rivus Batteries recently secured a EUR525,000 infusion of capital. According to the CEO and founder Dr. Cedrik Wiberg, the capital injection ...

InnoEnergy portfolio company, Rivus Batteries, raises half a ...

The organic flow battery company Rivus Batteries recently secured a EUR525,000 infusion of capital. According to the CEO and founder Dr. Cedrik Wiberg, the capital injection will help the company to scale-up its electrolyte production and install their first full scale pilot batteries with customers.

Rivus Batteries

Rivus pioneers organic, metal-free electrolytes for flow batteries, challenging the current reliance on vanadium, a scarce heavy metal. Their non-flammable electrolytes offers higher energy density, full compatibility w

Our Technology

Rivus batteries are part of the solution to achieve a more flexible energy system with fewer emissions and a reliable supply of power. Low environmental footprint compared to metal-based batteries. Not vulnerable to resource scarcity, instead of high-demand metals, we use an abundant natural resource

Rivus Batteries, raises half a million Euros to deploy

Rivus Batteries secures EUR0.5M from xista science ventures, NAVCAP AB, and EIT InnoEnergy to fast-track the deployment of its metal-free organic battery technology. The Swedish start-up aims to halve the cost and climate footprint of stationary energy storage by replacing heavy metal-based electrolytes with organic electrolytes for large-scale

Rivus Batteries, raises half a million Euros to deploy

Rivus Batteries secures EUR0.5M from xista science ventures, NAVCAP AB, and EIT InnoEnergy to fast-track the deployment of its metal-free organic battery technology. The Swedish start-up aims to halve the cost and ...

Rivus Batteries

Rivus Batteries is pioneering sustainable energy storage with its innovative, metal-free flow battery technology utilizing water-based organic electrolytes. The company focuses on reducing costs and environmental impact, offering a greener ...

Rivus Company Profile 2024: Valuation, Funding & Investors

Operator of a green technology company intended to develop novel organic electrolytes for flow batteries. The company's products consist of only abundantly available elements, redox-active ...

Rivus Batteries

Rivus Batteries Batteries are needed to store renewable energy - it's not always windy when you want it to be, and the same applies to the hours of sunshine. Rivus' idea is for gigantic batteries to be placed at solar and wind farms.

Rivus Company Profile 2024: Valuation, Funding & Investors

Operator of a green technology company intended to develop novel organic electrolytes for flow batteries. The company's products consist of only abundantly available elements, redox-active molecules that can be synthesized on a large scale and with a small environmental footprint compared to conventional technologies, enabling cost-effective

About Us

Rivus is a climate tech start-up on a mission to enable ultra low-cost and eco-friendly grid-scale energy storage. Led by a team of dedicated chemists, battery experts and entrepreneurs our aim is to fundamentally transform how energy is stored, supporting the global energy transition away from fossil fuels.
