

St Kitts and Nevis ph electrode storage solution

St Kitts and Nevis ph electrode storage solution

pH Electrode Storage Solution

Storage solution for pH electrodes. Storage solution is pre-mixed for ready use Convenient bottle size Allows easy maintenance of pH electrodes Proper pH electrode storage will maximize electrode performance and extend electrode life.

Storage solution for pH electrodes

pH electrode storage solution is an essential solution for maintaining and stabilizing pH electrode usage conditions. It helps to improve the accuracy and lifetime of pH electrodes, making it ideal for various applications in different industries.

pH Buffer Calibration Solution 3-Pack

Buy pH buffer calibration solution 3-pack for accurate pH meter calibration. Made in Saint Kitts and Nevis, NIST traceable, color coded for easy identification. Free certificate of analysis.

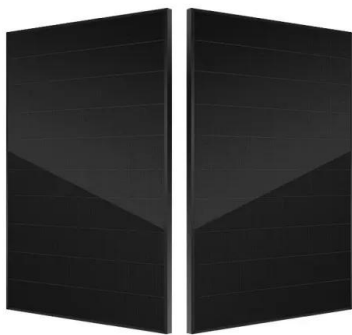

Hanna Groline

Key Features Special formulation to minimise microbial growth and osmotic/diffusion effects between the solution and inner reference electrolyte Manufactured specifically for pH and ORP electrodes Air tight bottle with tamper-proof

seal

Applications

Electrode Storage Solution, 500ml

A re-sealable bottle containing 500ml of Hanna Instruments (HI-70300) storage solution. Always store your electrode in a solution to ensure the junction does not 'dry out'. This will improve the performance of the electrode as well as prolonging the operational life.
