### Evaluating strategies for renewable energy development in Rwanda...

This study adopts a Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis and Interpretive Structural Modeling (ISM) to evaluate strategies for the development of RE in Rwanda.

SWOT analysis was used to identify factors affecting the energy sector in Rwanda, based on which 13 strategies were proposed.

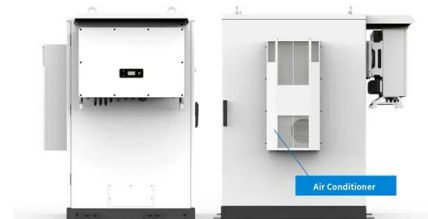

### Rwanda's Energy Profile and Potential Renewable Energy ...

Abstract: This paper first discusses the current energy profile in Rwanda where it focuses on electrical energy status in order to evaluate the available power generation, transmission system, and load growth. The paper also continues to track the possible available and untapped renewable energy resources and outlines the credible Path-ways for

### Rwanda State of Environment and outlook report

The energy sector in Rwanda is made up of three sub-sectors: power, hydrocarbon and new and renewable sources of energy. Amongst the renewable sources of energy are biomass, solar, peat, wind, geothermal and hydropower.

### Energy - The Opportunity in Rwanda

The mission of the Rwanda energy sector is to create conditions for the provision of safe, reliable, efficient, cost effective and environmentally appropriate energy services to households and to all economic sectors on a sustainable basis.

## Rwanda: Energy Country Profile

## Rwanda

The main energy sources for electricity generation in Rwanda are fossil thermal and hydropower. AFREC's energy balance 2020 show that biomass in Rwanda contributed to 92% of its total final consumption. Most of this biomass was consumed in the household sector at 85% followed by commerce and public service sector at 15%.
