In Timor-Leste's post-conflict society, the government's pursuit of electrification to improve social cohesion through enhanced communication is an understandable initial driver for a newly established country.

Energy in East Timor

East Timor consumes 125 GWh of electricity per annum, an average of 95 kWh per person. [1] The country has about 270 MW of electricity

capacity, 119 MW in the city of Hera. Most of the energy infrastructure was destroyed by the Indonesian militias ...

Going Green

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.
